

CBD 1000

CHEQUE BOOK DISPENSER

The CBD 1000 is a Cheque Book Dispenser designed purposefully for producing on-demand cheque books. While the production method of yester-years proved efficient by means of outsourcing; innovation & technology today have made it possible for financial institutions to re-engineer this process with the aim of achieving maximum operational efficiency. With online ordering capabilities, the CBD 1000 does not geographically limit cheque book requests to its place of issue. Requests can be made in Branch A while its place of issue in Branch B. Alternatively, customers who make use of Home Banking services can also place a request from home via the internet or telephone, and collect their cheque books at the branch later.

Carefully designed with minimum footprint to complement your back office, the CBD 1000 is built complete with a code line printer, text printer, stapling and binding station. It is capable of personalizing every cheque with Customer Name, Cheque Number and Bank Branch, printing magnetic characters according to ISO standard, stapling as well as binding up to 53 pages with self adhesive cloth-type tape. It is also capable of personalizing cheque book covers with your institution's logo and printing re-order forms to be included within every cheque book.

The CBD 1000 reduces the cost of producing cheque books, and replaces your need to outsource its printing as well as keep stock of pre-printed cheques. By eliminating the need for pre-printed cheques storage costs and decreased handling to-and-from the printing shop, significant cost savings can be realized. Cheque books can be produced upon customer request at an efficient speed of 1 minute 30 seconds for a 25-page cheque book, hence promoting just-in-time production.

The CBD 1000 has undoubtedly revolutionized the production of cheque books; bringing your operational efficiency to its highest level and providing another avenue to improve your customer service.
