SID mart INTELLIGENT DEPOSIT

Cash deposit system for retail businesses

INCREASE THE ACCURACY AND EFFICIENCY OF RETAIL CASH MANAGEMENT

Today retailers can interact more and better with customers, since they spend less time for cash transactions, transferring cash from the point of sale to the safe, counting cash in preparation for bank deposit and reconciling discrepancies when totals do not match receipts.

The SID is an innovative solution perfectly suited to the retail environment, ideal for retailers who manage high volumes of cash and need to increase the security of their cash and effectively close the cash management loop.

CASH FLOW PROCESS OPTIMIZATION & SECURITY

The SID enables large deposits using a high capacity plastic secure bag, holding approximately 5.000 banknotes.
The system allows retailers to deposit their incoming cash without leaving their premises. The cash as a result is processed more securely, at lower cost and at a high operating speed which exceeds existing solutions currently available for this market.

FULLY EQUIPPED DEVICE

Long Edge Validation Module
Badge Reader
Barcode Reader
Thermal Printer
Touch Screen Display
Internal PC and UPS

A BANK "EXTENSION" IN-STORE
FOR INSTANT BANKNOTE DEPOSIT

small retail shops
small supermarkets
pharmacies/drug stores
petrol/gas stations

The SID at a glance

UP TO **180** NOTES/MIN	**SAVING**	**TOUCH** SCREEN	CAPACITY **5000** NOTES	**SECURE**
HIGH SPEED	EFFICIENT	USER FRENDLY	AUTO-SEALING TAMPER EVIDENT PLASTIC BAG	REDUCE SHRINKAGES

The device is managed through an intuitive touchscreen interface that runs Cash Control, the CTS powerful onboard cash management platform. After each transaction a receipt is issued to the operator and reports provide a comprehensive summary of system activity, making easier for cashiers to close out their shift, managers to handle end-of-day operations and CIT to withdrawal cash much faster.

OVERALL BENEFITS

INCREASE SECURITY

Advanced Validation Technology based on unique sensors and modules to enable the most reliable authentication of banknotes.

REDUCE HUMAN ERRORS

Highly Automated System for accurate cash management eliminate all human errors common in manual operations.

IMPROVE LOGISTICS

Reduce global costs introducing automatic solutions for cash handling and transportation.

SPECIFICATIONS

Standard Features

Feeder capacity	50 notes * (continuous feeding)
Reject pocket capacity	20 docs *
Auto-sealing plastic bag	up to 5.000 notes *
LCD touch screen display	7" (16:9 format, 800x480 resolution)
Thermal receipt printer	80 mm
Safe	Steel strong box 6 mm
Lock	Electronics and mechanical locks
Security sensors	"door oper" sensor
User identification	Magnetic stripe reader 1-2-3 and chip card reader
Connection	LAN 100Mbit/sec - 1Gbit/sec

Envelop Deposit Slot
UPS and Internal PC with Win XP embedded
API for device integration with customer SW application and device monitoring
Many currencies available

Performances

Cash Processing	180 notes/min, 3 notes/sec

Optional Configurations

Barcode reader
Safe UL291, CEN III

Dimensions & Weight

510x 540 x 1000 mm (W x L x H)
180 kg (Strong Box Configuration)
290 kg (UL291)
